Do You Know What We Know?

Example: Your Lease Might Require Plenum Cable Removal

Need large volumes of Tech Equipment changed out, destruct certified, post-cleaning salvaged? Need critical IT Infrastructure moved or transported? Need a resource that does the work while you be the smart person? Warning; We're Really Good at This!

Most modern leases require the removal of low-voltage cabling in the plenum area above the ceiling. Forget about this requirement and you could face costly post-move penalties. This is one example of mandatory lease compliance. Allow us to help you make sure to be fully lease compliant when exiting your space

What Tech Team Solutions Does for You:

- We remove low-voltage cabling from above-ceiling spaces
- We provide post-task documentation proving lease compliance
- We coordinate with building management to ensure everything meets requirements
- We minimize disruption by working after hours, meeting your timelines
- We handle salvage disposal responsibly, recycling whenever possible

Who We Are: TechTeam Solutions is part of the Total Office Solutions family of “Anywhere” companies and is a leading technology moving specialist with over 40 years of experience safely relocating IT infrastructure. We handle everything from single PC moves to complete data center relocations with zero downtime as our goal.

What We Do: We provide complete technology services including PC disconnect/reconnect, server relocation, network infrastructure moves, cable management, equipment installation, secure data destruction, and e-waste disposal for businesses of all sizes across local, regional, and national markets.

Avoid Costly Surprises When You Move Out and Schedule Your Pre-move Related Tech Services.
